July 2, 2007

To Whom It May Concern:

White Drive Products, Inc. began doing business with COMPUS Computer GmbH, located in Munich Germany, in October 2006. At that time, we were beginning the process of converting our German distribution office to Microsoft Dynamics AX 3.0. We needed a company to assist in training our German bookkeeper in how to use Dynamics AX as well as to develop a link between Dynamics AX and the German tax and finance software DATEV. Also we needed support in the setup of Dynamics AX with respect to VAT in Europe and Intrastat.

With the assistance of COMPUS, we were able to meet our go-live date of January 1, 2007. COMPUS has since assisted us with our German office's upgrade to Dynamics AX 4.0.

We have found Compus to be very knowledgeable in Dynamics AX and DATEV as well as the link between these two products. We would recommend their services for training on AX and DATEV as well as implementation on these products.

Sincerely,

Donna Pickerill  
Controller
